

POOL BARRIER INSPECTION

QBCC have 2 pool categories

1. Residential
2. Shared Pools

Swimming pool safety laws set by QBCC aim to minimise the chance that young children can get into the pool area unsupervised. This means all Pool barrier standards are the same for both shared pools and residential pools but for the public's safety the QBCC have applied 2 stricter rules that apply only to shared pools.

At Saurus Constructions we have no hidden costs, and don't charge extra for certificates, advice, minor repairs or return visits, just one payment of \$250 and we stay with you until your pool is compliant and we issue your certificate.

Unfortunately, not all pool can pass first inspection and require works to be carried out, we will send you a video you can forward to your maintenance crew explaining exactly the work that needs to be completed and even offer tips on how to achieve this Once works have been completed by your maintenance crew give the team at Saurus Constructions a call 0428 823 667 to re-inspect, we will then email you:

- Saurus Constructions report with photos
- Video of complying pool gates at time of inspection for your records
- QBCC Form 23 Pool Safety Certificate
- Shared pools will be put into our system for reminder notice one month before your current certificates expiry date

Make a booking or call us now.
